What's New in R:BASE X.5 (Version 10.5) UPDATE 1 Official Release Version Build: 10.5.1.21212

Requested Enhancements	10/20/2018 - 12/12/2018
------------------------	-------------------------

Item	Date Implemented	Description
------	------------------	-------------

- | | | |
|-----|------------|---|
| 01. | 10/30/2018 | <p>Commands - Is there a way to get the position of the mouse pointer on a right click, click, etc?</p> <p>Four addition properties were added to support the ability to recognize the mouse position by X,Y coordinates, for the current window, or the entire screen.</p> <p style="margin-left: 40px;">. MOUSE_FROM_SCREEN[X]
 . MOUSE_FROM_SCREEN[Y]
 . MOUSE_FROM_WINDOW[X]
 . MOUSE_FROM_WINDOW[Y]</p> <p>Example:</p> <p style="margin-left: 40px;">GETPROPERTY APPLICATION 'MOUSE_FROM_WINDOW[X]' 'vFormX'
 GETPROPERTY APPLICATION 'MOUSE_FROM_WINDOW[Y]' 'vFormY'</p> |
| 02. | 11/20/2018 | <p>Utilities - The CHOOSE, PAUSE, and DIALOG command syntax builders (Utilities > Plugins) were updated to produce color names instead of integer values.</p> |
| 03. | 11/21/2018 | <p>Forms - I need an EEP when an item is dragged within the list of a Variable Lookup List View. There is a Drag and Drop EEP, but it is looking for an item to be dragged in and dropped from elsewhere than the same list/control.</p> |
| 04. | 12/03/2018 | <p>Forms - For the Enhanced DB Grid control, is it possible to provide an option to not display the vertical scroll bar.</p> |
| 05. | 12/06/2018 | <p>Reports - Can the Items in the PDF Combo Box and PDF List Box report/label controls include the functionality to be populated from a table lookup/SELECT command, to avoid having to manually modify the list for every change.</p> <p>A new "Data Query" option is available to specify a SELECT command to populate the control.</p> |

06. 12/07/2018 Forms - It would be useful in drag-and drop operations if R:BASE would provide the Component ID for the object being dragged, and the Component ID for where that dragged object is dropped. Two (GETPROPERTY only) properties have been implemented:

. DraggedCompID - returns the Component ID of the dragged object, and is valid in the "On Start Drag" EEP only

. DroppedToCompID - returns the Component ID for where a dragged object is dropped, and is valid in the "On Drag Drop" EEP only

Examples:

GETPROPERTYRBASE_FORM DraggedCompID vDragComponent

GETPROPERTYRBASE_FORM DroppedToCompID vDroppedToComponent

07. 12/10/2018 Settings - When FEEDBACK is set ON it would be nice to be able to see which table is being used.

Item	Date Fixed	Description
01.	10/29/1899	Commands - When using #WHERE to define a predefined WHERE Clause for the CHOOSE command, the quotes are stripped from the specified criteria.
02.	10/24/2018	R:BASE Editor - R:Style, the programmer's friend, is not recognizing the NO_FOCUS option in PAUSE commands, and is adding the keyword to the RStyle.new file.
03.	10/30/2018	Help Files - The PAUSE command syntax diagram does not include the BUTTON option.
04.	11/15/2018	Functions - When a list of items are evaluated by the LISTOF function, where some text items contain embedded commas, the returned value is incorrect.
05.	11/15/2018	Commands - When generating a CHOOSE list of options from a variable string containing consecutive commas, the list is populated incorrectly.
06.	11/20/2018	Data Dictionary - The values within "Color" and "Name" columns are off by two colors after WHITE. At first it is just two colors, then near WEBRED it is off by three, and somewhere down list it is off more so.
07.	11/20/2018	Commands - Using PAUSE, DIALOG, and CHOOSE commands with the extended "Web Colors", being used from the Data Dictionary, the values are not displayed.
08.	11/21/2018	Database Explorer - An attempt to insert an apostrophe into an existing comment displayed in the Database Explorer with the "Change Comment" option returns an error. It is possible to include an apostrophe within a table comment within the New Table design wizard.
09.	11/29/2018	Database Explorer - When R:BASE is launched in a folder which contains an ampersand, the accelerator character is displayed in the property bar of the Database Explorer.
10.	11/29/2018	Forms - When selecting to right click and delete a Lookup List View control the object is not deleted.
11.	11/29/2018	Database Explorer - When the "Change Current Folder" button on the property bar is launched and selects a folder which contains an ampersand, the accelerator character is displayed in the status bar caption.
